AB Magique

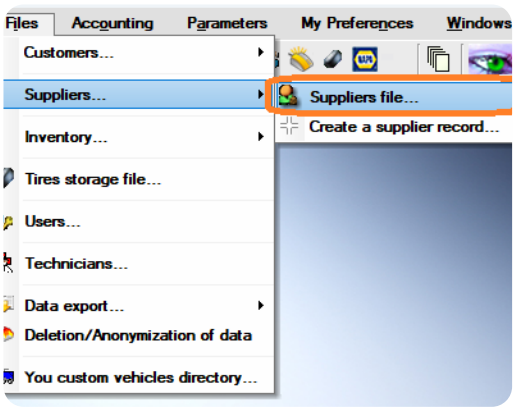

New PROLink integration

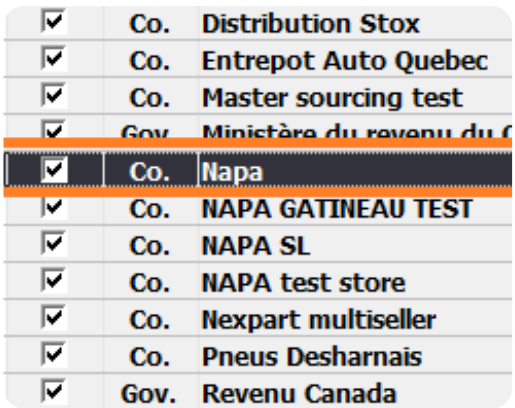

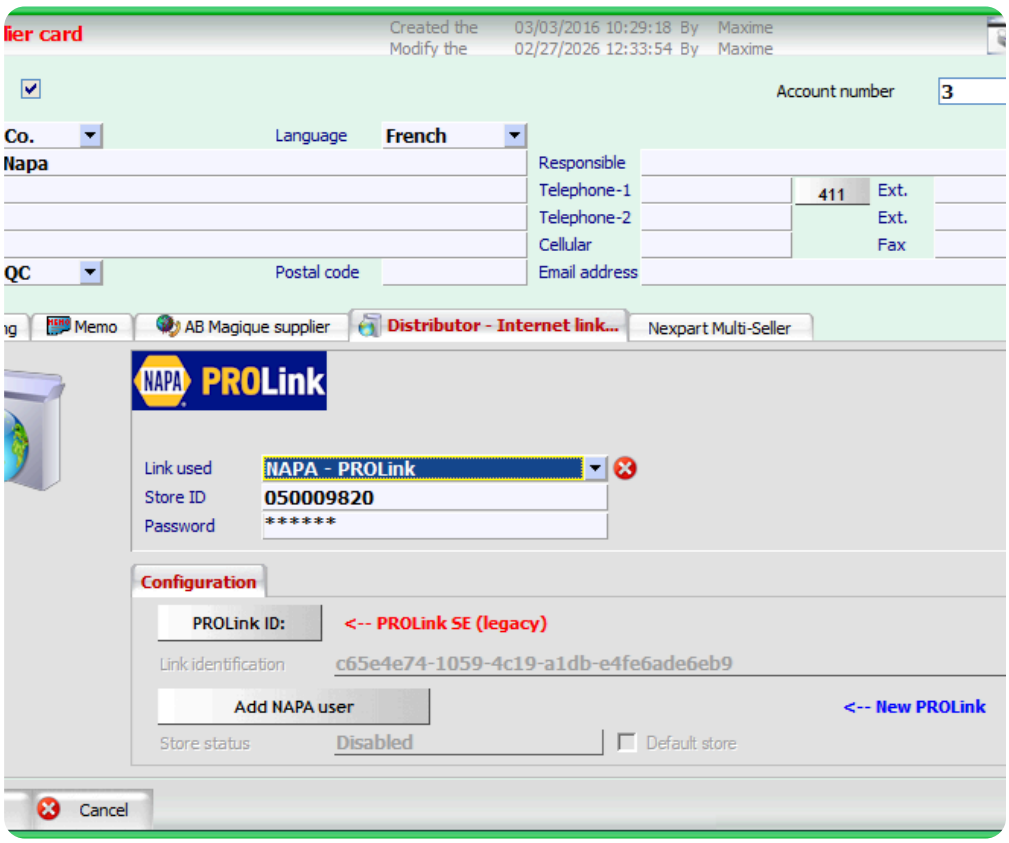

Creating your user

Select the “Files” tab at the top of the window, followed by “Suppliers” and then “Suppliers file…”. Select your main NAPA store or create it.

In the supplier’s file, select the “Distributor – Internet link…” tab and select the “NAPA – PROLink” option in the “Link used” section.

For new stores, insert the store ID in the corresponding field. (Number starting with 05000 or 06000)

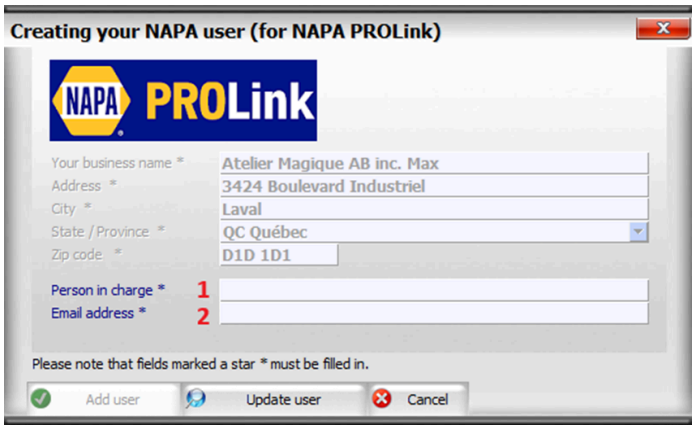

Insert your account ID in the “Password” field (D + your account number with a minimum of 5 numbers) e.g. : If your account number is 1401, your account ID would be D01401.

Click on the “Add NAPA user” button.

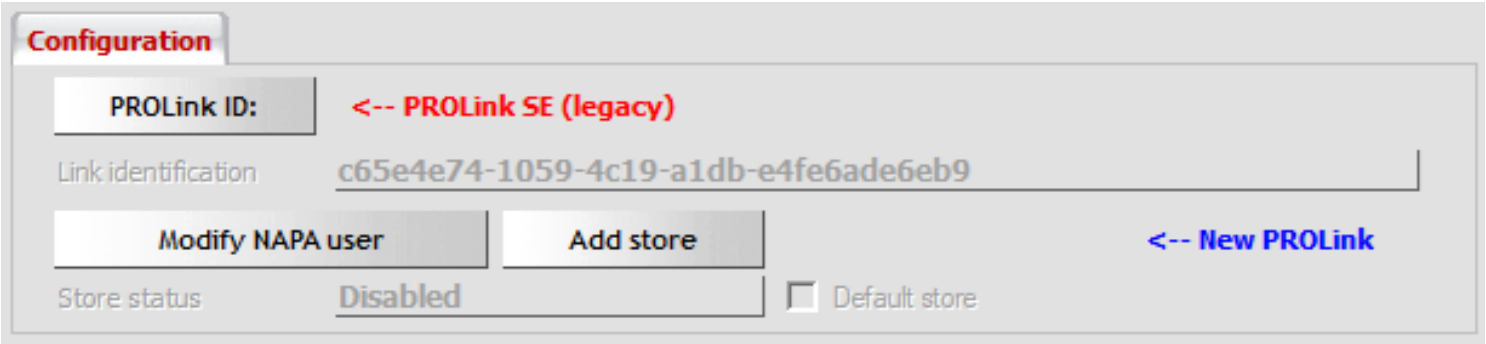

1 - Insert the account responsible’s name in the “Person in charge” field.

2- Enter the email you want your user to be associated to in the “Email address” field.

3- Click the “Add user” button.

Once the user has been successfully created, repeat the next steps for each NAPA store you have as a supplier in your software:

1 - Select your NAPA supplier in your supplier’s list.

2 - Select the “Distributor - Internet link” tab.

3 (Optional) - If the “Link identification” field is empty and you would like to also have access to the legacy PROLink SE integration, click on the “PROlink ID” button. Otherwise, don’t click this button.

4 - Click on the “Add store” button. The first store added will always be your default one. Otherwise, the software will ask if you would like to make this new store the default one. Select the desired option when prompted. You can always change your default store later.
